Marbled murrelet

April 21st, 2020 - The marbled murrelet *Brachyramphus marmoratus* is a small seabird from the North Pacific It is a member of the auk family It nests in old growth forests or on the ground at higher latitudes where trees cannot grow Its habit of nesting in trees was suspected but not documented until a tree climber found a chick in 1974 making it one of the last North American bird species to have its nest''**The Mystery Of The Marbled Murrelet Bird Watcher S Digest**
