---

---

## **below on how to order this dvd** improving image quality with stacking and super resolution

May 27th, 2020 - the idea behind super resolution came from astrophotography and the principle of stacking images stacking is when you

place one image above another forming a stack when an image is taken the sensor records the scene exactly the same if the light is

consistent except for digital artefacts like noise which are randomly created and so different in each image

**best telescope for**

### **astrophotography best camera**

May 27th, 2020 - telescopes the best type of telescope for astrophotography will vary greatly depending on the type of imaging you want to

do if you want to image the planets and have fine resolution on the moon you will want a telescope with a large aperture and long focal

length

---

## ~~'pixel Scale And Resolution In Astrophotography Astrojole~~

~~May 27th, 2020 - Binning Effect But But Doesn T When You Attach 10um Pixel Camera To 100 1000 Telescope You Will Get The Same Result As With 5um Camera To 100 500 Telescope Also Sound Like Binning Again Yes Binning Is Just The Increase Of Pixel Size Signal Collected From Adjacent Pixels Is Transferred To One Output Register And Then Read From Camera 5um Pixel Camera Attached To 100 500'~~
