read more''**radio astronomy**

June 5th, 2020 - radio astronomy is a subfield of astronomy
that studies celestial objects at radio frequencies the
first detection of radio waves from an astronomical object
was in 1932 when karl jansky at bell telephone laboratories
observed radiation ing from the milky way subsequent
observations have identified a number of different sources
of radio emission these include stars and galaxies as well
as entirely new classes of objects such as radio galaxies
quasars pulsars and masers the discovery'
