'**java Servlet**

May 31st, 2020 - A Java Servlet is a Java software component that extends the capabilities of a server. Although Servlets can respond to many types of requests, they most commonly implement web containers for hosting web applications on web servers and thus qualify as a server-side Servlet web API. Such web Servlets are the Java counterpart to other dynamic web content technologies such as PHP and ASP.NET.

'**how To Use Apache Tomcat To Run Java Servlets On Your**

May 31st, 2020 - By Doug Lowe Unfortunately you can't run Java's Servlet programs on any old PC. First you have to install a special program called a Servlet engine to turn your PC into a server that's capable of running

Servlets. The best known Servlet engine is Apache Tomcat, which is available free from the Apache Software Foundation. Here the early release Tomcat version 8 was used. **java Stack Overflow**
